THERMAL FLIGHT STRIP PRINTER

Pegasus 301 R/L is an industrial thermal progress strip printer for Air Traffic Control applications, using Pegasus 301L/R you print thermal sensitive flight strips in Thermal Direct Printing Technology in special two-colored thermal paper, flight strips can now be designed in an even more striking fashion.

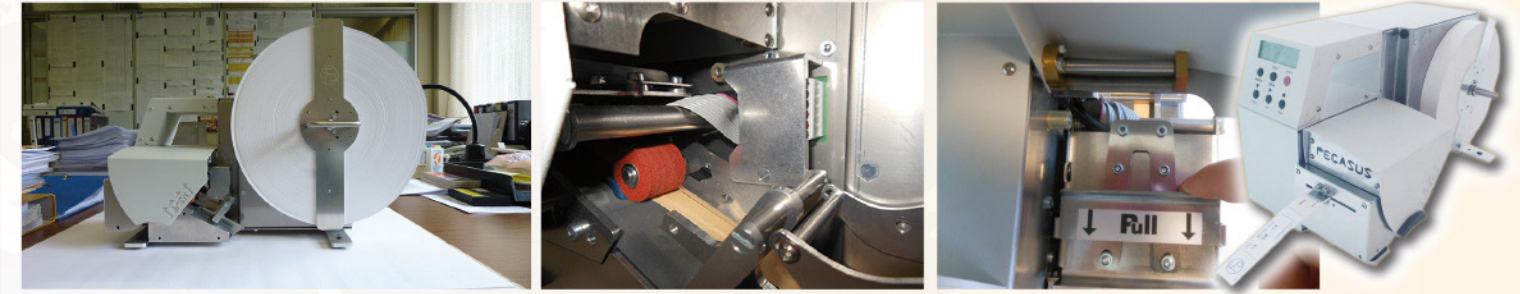

This printer combines attractive design with robust mechanic, powerful electronics and a high resolution thermal print head. For RFID applications the printer can be equipped with an optional RFID unit to encode all common standard transponders.

The Features:

- Small and light thermal direct printer
- Display screen friendly - easy setup
- Mains connection with auto-switch
- USB interface
- Semi-automatic paper feed
- Two holder systems for Roll and Fanfolded paper
- Support of two-coloured printing

Advantages:

- Fast delivery worldwide
- Product warranty 5 years minimum, parts & after sale service
- Competitive price for a high quality
- Fast after sale service
- Technical assistance & problems solved within 30 days

THERMAL FLIGHTSTRIP PAPER

A flight progress strip is a small strip of paper used to track a flight in air traffic control. HIS is an unique company who is able to manufacture and supply you with Flight strips paper in all type and sizes.

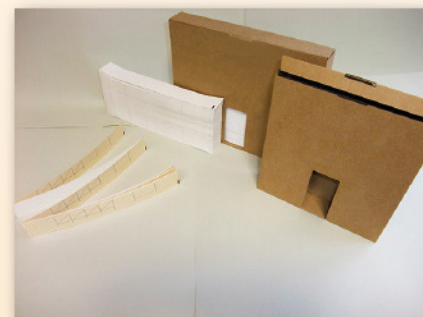

We have selected the best thermal paper with :

FLIGHT PROGRESS STRIP HOLDER

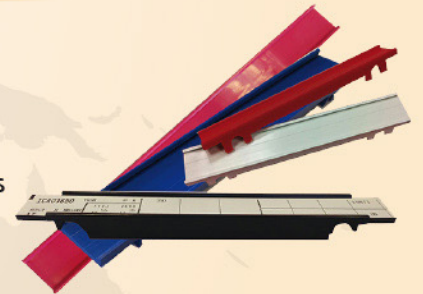

Flightstrip holder is a plastic injection moulded holder designed and manufactured following ATC and Air traffic controllers' requirements.

It strictly meets all specifications to offer comfortable use and long life.

HIS Hermieu International Supply is able to provide you with high quality strip-holders for flight strip progress fanfold or roll paper.

Spring loaded system or standard, in several sizes.

This is available in any colour you may need with a competitive price.

FLIGHT STRIP HOLDER RACKS

The flightstrip holders are placed in a strip board called flight stripholder rack which is used as a representation of all flights in a particular sector of airspace in an airport. The strip board has vertical rails in Stainless steel that constrain the strips in several stacks.

HIS is able to supply you with high quality white metal racks of several sizes and types including:
Racks for housing 10 stripsholders 8" x 1" : Width 25mm x High 2mm, Long 34mm, weight 1.65 kg.
Racks for housing 20 stripsholders 8" x 1" : Width 50mm x High 2mm, Long 34mm, weight 3.3 kg.
